

E-mail + Messaging Service

Say goodbye to the headaches of monitoring SPAM and Virus control on your own, and say hello to the secure and convenient solution that HeatSeeker provides to satisfy your business email needs.

Security and Reliability

Product Features

Business e-mail service based on Microsoft Exchange

- E-mail archives
- SPAM filtering
- Virus filtering
- Microsoft Outlook client interface
- Web based client interface
- Mobile PDA/phone interface
- Personal & shared scheduling
- Personal & shared folders
- Unified e-mail and fax solution
- Share your calendar with your team and find your co-workers in a global directory
- Access all of your e-mail, contacts, and appointments from anywhere

Benefits

No longer is investment and maintenance of an Exchange Server required for your e-mail. You'll appreciate the security of knowing backups are being performed off site to keep all of your data safe and secure. Now, you can leave the maintenance and on-going upgrades to us. We ensure a reliable service you can depend on.
